Bacon Salt:

To make Bacon Salt – Transfer bacon to a food processor and process until there are only small chunks and a paste begins to form. Add in the sea salt and ground pepper (whole peppercorns will not break up in the food processor) and continue to process until the salt breaks up into smaller pieces and mixes with the bacon. Transfer to an airtight jar and keep in the refrigerator when not using.

We recommend homemade bacon salt however if you do not want to make your own you can buy premade bacon salt here.
